

Project 2 | Enginow

Enginow website redesign, so basically don't focus on current brand templates or pages, you need to start from scratch.

So basically the website will be having a main website for public visibility, all can see and access. It will be having 5 roles (Learner(Student) ,Educator, HR,Sales, Admin) so in main website student login will be there for others access a dedicated dashboards will be there for admin and educator, admin,sales and educators will be having dashboard from where they can perform all the defined tasks,

Now public pages in website will be Homepage, about , training, courses, services, contact, blogs, resources

, careers, practice, assessment, Shop

other pages will be brand-guideliness, privacy-policy, terms-and-conditions, refund-policy, cookie-policy, shipping -policy.

Summer-internship, monsoon internship, spring internship, winter internship

All the learners will be having the dedicated dashboard where they can track the applications for the job/internship they have applied for, courses they are enrolled in, see the certificates.

It will be also having a verify page with the same url [enginow.in/verify/\[credentials\]](http://enginow.in/verify/[credentials]) Though this certificates verification can be there.

In admin side dashboard all the CRUD operation can be performed, all the users will be visible, website will be having referral code things, like every user will be having a referral code

It will be a 7 digits unique code combination of 0-9 and a-z both, automatically attached if user is sharing something like from career section, courses, training program , blogs etc.

Admin will have

- Users list with their referral codes, with all the details.
- Can Create jobs, internship in career section.
- Can write blogs and all CRUD Operations
- Can upload courses and all CRUD operations
- Can see all the applications, enrolments
- Can see the history in which they have applied (internships, jobs), enrolments
- **Can generate offer letters, certificates, LOR, LOE and other documents**

Educator will have

- The power to add courses, edit course and delete, after adding it will be sent to approval from admin, then it will be live.
- Can see enrolled users in particular course, total unique users
-

Human Resource will have

- The power to add listings, edit listing, updated, delete listings, to add It will be sent to admin approval.
- Can see the applications

Sales Person will have

- See the analytics like courses more enrolled, which year students are enrolled etc...

Home Page

In home page, users can see the details like popular courses, featured courses, popular programs programs, testimonials

Courses

In courses, user can see the listed courses

- Free
- Premium

Some badges

- New
- Popular

Category will be there like AI, Development

Search filters for this and free, premium

Inside each card of course details of that will be seen, like roadmap etc. They will see the few buttons according to the course like Enrol Now, Coming Soon.

If enrolled then whenever user visits the course he/she will see enrolled button and visit course

In dashboard they can see it also

so 3 slugs or pages main page, description, after enrolling actual course page.

While listing the course, it requires title, description , banner image 1920*1080, in that Youtube video link, notes of that option of adding more videos link and notes of that.

Services

We are providing different services like Website Development, App Development , Custom Software Solutions, Consulting, Etc so Individuals, Companies , Startups can contact us.

Trainings

List our training programs, like courses

Shop

In this list our products like Diaries, T-shirts, Pen, Stickers, Cup, Key Chains

A customisation page from where diaries can be customised and previewed, and saved.

Careers

Listed applications will be having two categories

- Jobs
- Internships

Users can apply in any job/internship only once and whenever they visit that job/ internship they will see that they have already applied.

Once the job/internship is closed by the admin. Hr then it will be showing a badge expired and no body can apply now.

They will also be able to see in their dashboard

Along with the process

Hr can choose them as shortlisted, OA , Selected

And user will be able to see in their dashboards about the status.

Resources

Here from admin side basically Admin , Educator can add pdfs as resources

Blogs

In this there will be blogs listed, and the people can see the blogs, written by, time created, time updated. Like , share and save

From other roles, every role can submit the blogs it requires a title, short excerpt, Banner (1920 * 1080) Optional , content (Rich text editor supporting links, bold , italic, code, quotes)

Blogs will be submitted from dashboard and will be sent for approval to admin, so all the roles can post blog but needs approval from Admin.

About

Here, list the goals of company, about company, technologies, what we are doing when it started (timeline), tech stacks, how we are unique.

Contact

In this page list the contact form, with a category dropdown like sales, career , custom, they can fill that form and submitted.

List all the social platforms Links, office address

Practice

Users can attend various test, practice some questions related to subjects

Assessment

In this various time monitored assessment in full screen properly protocored will be there, Assessment data will be shared with HR, Admin it will be used only for hiring purpose we will share it to particular emails, like those who have applied and are to be available for shortlisted in their account they will be able see that assessment.

Admin can add assessments, HR can also add the assessments

Privacy Policy

List the privacy related. Content, that their content, data all is protected

Terms & Condition

List the terms and conditions

Refund Policy

List the refund that currently no refund is available at any feature, its totally non refundable

Cookie Policy

We collect cookies to make your experience better

Shipping Policy

We have shipping partner Delhivery and all the physical products are shipped through Delhivery so once shipped from our end, we don't have liability of that, for any issue contact Delhivery

Brand Guidelines

List the downloadable format logos, colours how to use etc.

Summer Internship
